Preface	iii
1 Origins and Manifestations of Speckle	1
1.1 General Background	1
1.2 Intuitive Explanation of the Cause of Speckle	2
1.3 Some Mathematical Preliminaries	3
2 Random Phasor Sums	7
2.1 First and Second Moments of the Real and Imaginary Parts of the Resultant Phasor	8
2.2 Random Walk with a Large Number of Independent Steps	9
2.3 Random Phasor Sum Plus a Known Phasor	12
2.4 Sums of Random Phasor Sums	15
2.5 Finite Number of Equal Length Components	17
2.6 Nonuniform Distribution of Phases	18
3 First-Order Statistical Properties	23
3.1 Definition of Intensity	23
3.2 First-Order Statistics of the Intensity and Phase	25
3.2.1 Large Number of Random Phasors	25
3.2.2 Constant Phasor plus a Random Phasor Sum	27
3.2.3 Finite Number of Equal-Length Phasors	30
3.3 Sums of Speckle Patterns	34
3.3.1 Sums on an Amplitude Basis	34
3.3.2 Sum of Two Independent Speckle Intensities	35
3.3.3 Sum of N Independent Speckle Intensities	38
3.3.4 Sums of Correlated Speckle Intensities	41
3.4 Partially Polarized Speckle	44
3.5 Partially Developed Speckle	46
3.6 Speckled Speckle, or Compound Speckle Statistics	50
3.6.1 Speckle Driven by a Negative Exponential Intensity Distribution	50
3.6.2 Speckle Driven by a Gamma Intensity Distribution	51
3.6.3 Sums of Independent Speckle Patterns Driven by a Gamma Intensity Distribution	53

4	Higher-Order Statistical Properties of Speckle	57
4.1	Multivariate Gaussian Statistics	57
4.2	Application to Speckle Fields	58
4.3	Multidimensional Statistics of Speckle	60
4.3.1	Joint Density Function of the Amplitudes	62
4.3.2	Joint Density Function of the Phases	64
4.3.3	Joint Density Function of the Intensities	66
4.4	Autocorrelation Function and Power Spectrum of Speckle	69
4.4.1	Free-Space Propagation Geometry	69
4.4.2	Imaging Geometry	77
4.4.3	Speckle Size in Depth	78
4.5	Dependence of Speckle on Scatterer Microstructure	80
4.5.1	Surface vs. Volume Scattering	81
4.5.2	Effect of a Finite Correlation Area of the Scattered Wave	81
4.5.3	A Regime where Speckle Size Is Independent of Scattering Spot Size	85
4.5.4	Relation between the Correlation Areas of the Scattered Wave and the Surface Height Fluctuations — Surface Scattering	87
4.5.5	Dependence of Speckle Contrast on Surface Roughness — Surface Scattering	93
4.5.6	Properties of Speckle Resulting from Volume Scattering	97
4.6	Statistics of Integrated and Blurred Speckle	100
4.6.1	Mean and Variance of Integrated Speckle	100
4.6.2	Approximate Result for the Probability Density Function of Integrated Intensity	105
4.6.3	“Exact” Result for the Probability Density Function of Integrated Intensity	107
4.6.4	Integration of Partially Polarized Speckle Patterns	112
4.7	Statistics of Derivatives of Speckle Intensity and Phase	114
4.7.1	Background	114
4.7.2	Parameters for Various Scattering Spot Shapes	117
4.7.3	Derivatives of Speckle Phase: Ray Directions in a Speckle Pattern	117
4.7.4	Derivatives of Speckle Intensity	120
4.7.5	Level Crossings of Speckle Patterns	122
4.8	Zeros of Speckle Patterns: Optical Vortices	125
4.8.1	Conditions Required for a Zero of Intensity to Occur	125
4.8.2	Properties of Speckle Phase in the Vicinity of a Zero of Intensity	126
4.8.3	The Density of Vortices in Fully Developed Speckle	128
4.8.4	The Density of Vortices for Fully Developed Speckle Plus a Coher- ent Background	130
5	Optical Methods for Suppressing Speckle	133
5.1	Polarization Diversity	134
5.2	Temporal Averaging with a Moving Diffuser	135
5.2.1	Background	135
5.2.2	Smooth Object	141

5.2.3	Rough Object	143
5.3	Wavelength and Angle Diversity	144
5.3.1	Free-Space Propagation, Reflection Geometry	145
5.3.2	Free-Space Propagation, Transmission Geometry	155
5.3.3	Imaging Geometry	158
5.4	Temporal and Spatial Coherence Reduction	160
5.4.1	Coherence Concepts in Optics	160
5.4.2	Moving Diffusers and Coherence Reduction	163
5.4.3	Speckle Suppression by Reduction of Temporal Coherence	165
5.4.4	Speckle Suppression by Reduction of Spatial Coherence	168
5.5	Use of Temporal Coherence to Destroy Spatial Coherence	174
5.6	Compounding Speckle Suppression Techniques	175
6	Speckle in Certain Imaging Applications	177
6.1	Speckle in the Eye	177
6.2	Speckle in Holography	180
6.2.1	Principles of Holography	180
6.2.2	Speckle Suppression in Holographic Images	183
6.3	Speckle in Optical Coherence Tomography	185
6.3.1	Overview of the OCT Imaging Technique	185
6.3.2	Analysis of OCT	186
6.3.3	Speckle and Speckle Suppression in OCT	189
6.4	Speckle in Optical Projection Displays	192
6.4.1	Anatomies of Projection Displays	194
6.4.2	Speckle Suppression in Projection Displays	197
6.4.3	Polarization Diversity	198
6.4.4	A Moving Screen	198
6.4.5	Wavelength Diversity	200
6.4.6	Angle Diversity	200
6.4.7	Overdesign of the Projection Optics	202
6.4.8	Changing Diffuser Projected onto the Screen	203
6.4.9	Specially Designed Screens	214
6.5	Speckle in Projection Microlithography	216
6.5.1	Coherence Properties of Excimer Lasers	217
6.5.2	Temporal Speckle	217
6.5.3	From Exposure Fluctuations to Line Position Fluctuations	219
7	Speckle in Certain Nonimaging Applications	223
7.1	Speckle in Multimode Fibers	223
7.1.1	Modal Noise in Fibers	225
7.1.2	Statistics of Constrained Speckle	226
7.1.3	Frequency Dependence of Modal Noise	230
7.2	Effects of Speckle on Optical Radar Performance	235
7.2.1	Spatial Correlation of the Speckle Returned from Distant Targets	236
7.2.2	Speckle at Low Light Levels	239
7.2.3	Detection Statistics — Direct Detection	242

7.2.4	Detection Statistics — Heterodyne Detection	247
7.2.5	Comparison of Direct Detection and Heterodyne Detection	255
7.2.6	Reduction of the Effects of Speckle in Optical Radar Detection	258
8	Speckle and Metrology	261
8.1	Speckle Photography	261
8.1.1	In-Plane Displacement	263
8.1.2	Simulation	264
8.1.3	Properties of the Spectra $\mathcal{I}_k(\nu_X, \nu_Y)$	267
8.1.4	Limitations on the Size of the Motion (x_0, y_0)	269
8.1.5	Analysis with Multiple Specklegram Windows	271
8.1.6	Object Rotation	271
8.2	Speckle Interferometry	272
8.2.1	Systems That Use Photographic Detection	272
8.2.2	Electronic Speckle Pattern Interferometry (ESPI)	276
8.2.3	Speckle Shearing Interferometry	279
8.3	From Fringe Patterns to Phase Maps	281
8.3.1	The Fourier Transform Method	281
8.3.2	Phase-Shifting Speckle Interferometry	283
8.3.3	Phase Unwrapping	284
8.4	Vibration Measurement Using Speckle	286
8.5	Speckle and Surface Roughness Measurements	289
8.5.1	RMS Surface Height and Surface Covariance Area from Speckle Contrast	290
8.5.2	RMS Surface Height from Two-Wavelength Decorrelation	291
8.5.3	RMS Surface Height from Two-Angle Decorrelation	291
8.5.4	Information from Measurement of Angular Power Spectrum	292
9	Speckle in Imaging Through the Atmosphere	295
9.1	Background	295
9.1.1	Refractive Index Fluctuations in the Atmosphere	295
9.2	Point-Spread Functions	297
9.3	Average Optical Transfer Functions	299
9.4	Statistical Properties of the Short-Exposure OTF and MTF	300
9.5	Astronomical Speckle Interferometry	305
9.5.1	Object Information that Is Retrievable	305
9.5.2	Results of a More Complete Analysis	307
9.6	The Cross-Spectrum or Knox–Thompson Technique	309
9.6.1	The Cross-Spectrum Transfer Function	310
9.6.2	Recovering Full Object Information from the Cross-Spectrum	312
9.7	The Bispectrum Technique	313
9.7.1	The Bispectrum Transfer Function	314
9.7.2	Recovering Full Object Information from the Bispectrum	315
9.8	Speckle Correlography	316
A	Linear Transformations of Speckle Fields	319

B Contrast of Partially Developed Speckle	323
C Statistics of Derivatives of Speckle	327
C.1 The Correlation Matrix	327
C.2 Joint Density Function of the Derivatives of Phase	330
C.3 Joint Density Function of the Derivatives of Intensity	331
D Wavelength and Angle Dependence	333
D.1 Free-Space Geometry	333
D.2 Imaging Geometry	336
E Speckle Contrast with a Projected Diffuser	341
E.1 Random Phase Diffusers	341
E.2 Diffuser that Just Fills the Projection Optics	344
E.3 Diffuser that Overfills the Projection Optics	344
F Statistics of Constrained Speckle	345
G Mathematica Programs	349
G.1 Speckle Simulation With Free Space Propagation	349
G.2 Speckle Simulation With an Imaging Geometry	349
Bibliography	353
Index	364
